

# IMPORTANT INFORMATION ABOUT YOUR COVID-19 ANTIGEN TEST

You received a rapid antigen test for COVID-19 today. Although this type of test is less accurate than a PCR test, it is the quickest way to identify those who may be infected with COVID-19 and allows you to quickly isolate and help prevent spread to others.

If you are currently having symptoms consistent with COVID-19, you will need to isolate away from others while awaiting your test results.

## IF YOUR TEST IS POSITIVE

You will be contacted within the next few hours concerning your test results.

- ✓ If you **are having symptoms** consistent with COVID-19, you will be instructed to isolate and follow the guidelines established by WVU.
- ✓ If you are **not having symptoms**, you may be instructed to return for a confirmation PCR test.

## IF YOUR TEST IS NEGATIVE

You will not be contacted unless you indicated you were having symptoms consistent with COVID-19 at the time of the test.

- ✓ If you **are having symptoms** consistent with COVID-19, you will be given instructions to isolate and have a confirmatory PCR test performed within the next 24 hours.
- ✓ If you are **not having symptoms**, you will be monitored with additional rapid antigen tests over the next several days/weeks. If you should develop symptoms, you should call WVU Student Health Services (304-285-7200) immediately for additional instructions.

Please provide your current contact phone number at registration so you can be contacted immediately with any test results or new information. You can also review your results by going to the website on the result card you received and entering the barcode number on the card.

Under all circumstances, you should continue to practice safe physical distancing, hand and cough hygiene, wear a mask or face covering at all times and monitor your symptoms each day. If you have questions, you can contact:
